JOB DESCRIPTION

TITLE
Senior Privacy & Security Analyst

JOB SUMMARY
The Senior Privacy & Security Analyst performs two core functions for the enterprise. The first is the day-to-day operations of the in-place security solutions while the second is the identification, investigation and resolution of security breaches detected by those systems. Secondary tasks may include involvement in the implementation of new security solutions, participation in the creation and or maintenance of policies, standards, baselines, guidelines and procedures as well as conducting vulnerability audits and assessments. The Senior Privacy & Security Analyst is expected to be fully aware of the enterprise’s security goals as established by its stated policies, procedures and guidelines and to actively work towards upholding those goals.

ORGANIZATIONAL RELATIONSHIPS

Reports to: Information Security Manager
Supervises: As assigned

ESSENTIAL DUTIES - May include, but not limited to the following:

- Assists in developing, implementing and maintaining the University’s risk management and disaster recovery programs for the Office of Technology, including managing the periodic testing of the disaster recovery plan designed to protect against the potential effects of disaster.
- Maintain current knowledge of security-related laws, codes, regulations, trends, and issues, including current and emerging technologies and best practices. Develop strategies and policies to ensure best-practice based regulatory compliance and reduce the enterprise’s legal exposure.
- Participates in the planning and design of enterprise security architecture, under the direction of the Information Security Manager, where appropriate.
• Participates in the creation of enterprise security documents (policies, standards, baselines, guidelines and procedures) under the direction of the Information Security Manager, where appropriate.
• Maintains up-to-date detailed knowledge of the IT security industry including awareness of new or revised security solutions, improved security processes and the development of new attacks and threat vectors.
• Recommends additional security solutions or enhancements to existing security solutions to improve overall enterprise security.
• Performs the deployment, integration and initial configuration of all new security solutions and of any enhancements to existing security solutions in accordance with standard best operating procedures generically and the enterprise’s security documents specifically.
• Maintains up-to-date baselines for the secure configuration and operations of all in-place devices, whether they be under direct control (i.e., security tools) or not (i.e., workstations, servers, network devices, etc.).
• Maintains operational configurations of all in-place security solutions as per the established baselines.
• Monitors all in-place security solutions for efficient and appropriate operations.
• Reviews logs and reports of all in-place devices, whether they be under direct control (i.e., security tools) or not (i.e., workstations, servers, network devices, etc.). Interpret the implications of that activity and devise plans for appropriate resolution.
• Participates in investigations into problematic activity.
• Participates in the design and execution of vulnerability assessments, penetration tests and security audits.
• Provides on-call support for end users for all in-place security solutions.
