JOB DESCRIPTION

TITLE
Senior Business Systems Analyst

JOB SUMMARY
Reporting to the Associate Provost of Technology and Chief Information Officer, the Senior Business Analyst works closely with academic and administrative departments and the Office of Technology to understand process requirements and technical solutions. The Senior Business Analyst will also be responsible for the creation, management and operation of systems for IT performance tracking, IT budgeting, application portfolio, project management, reporting, and IT communication/marketing. Use of business intelligence applications to enhance administrative decision making capabilities and support the management of key university information. Use, develop, and manage reporting tools, as well as defining, designing, testing and implementing reports. Identify and resolve technical problems with reporting systems. Document processes and requirements. Perform vendor research, negotiation and relations-advice management on strategy, options, alternatives based on findings and make recommendations as opportunities surface. Work is performed under supervision of the Office of Technology and performance is based upon completion of assignments and results obtained. The performance evaluation is conducted through the performance evaluation system and in accordance with the University Policies & Procedures.
