JOB DESCRIPTION

TITLE
Senior Learning Technologist - DEN

JOB SUMMARY
The Senior Learning Technologist is engaged in the planning and implementation of learning technology initiatives including the development and delivery of applications and systems training for end users. The role of the Senior Learning Technologist is to support Academic Affairs (AA) by providing client support, building new relationships, and maintaining existing client relationships. He/she will build, support, and maintain a spirit of cooperation and collaboration between AA and the Office of Technology. Managing client expectations is an additional and important aspect of the Senior Educational Technologist position. The Senior Educational Technologist is responsible for providing support for numerous applications at the department and enterprise level. This position will assist end-users of educational technologies and provide error resolution. The Senior Educational Technologist will provide technical support to faculty in developing online and converging courses that promote student learning through the effective use of academic technology. He/she will also provide technical consultation support in the use of emerging technologies. Work is performed under the limited supervision of the Director, Client Services; and performance is based upon completion of assignments and results obtained. The performance evaluation is conducted through the performance evaluation system and in accordance with University Policies & Procedures.
